Important note: Medicine is an ever-changing science undergoing continual development. Research and clinical experience are continually expanding our knowledge, in particular our knowledge of proper treatment and drug therapy. Insofar as this book mentions any dosage or application, readers may rest assured that the authors, editors, and publishers have made every effort to ensure that such references are in accordance with **the state of knowledge at the time of production of the book**.

Nevertheless, this does not involve, imply, or express any guarantee or responsibility on the part of the publishers in respect to any dosage instructions and forms of applications stated in the book. **Every user is requested to examine carefully** the manufacturers' leaflets accompanying each drug and to check, if necessary in consultation with a physician or specialist, whether the dosage schedules mentioned therein or the contraindications stated by the manufacturers differ from the statements made in the present book. Such examination is particularly important with drugs that are either rarely used or have been newly released on the market. Every dosage schedule or every form of application used is entirely at the user's own risk and responsibility. The authors and publishers request every user to report to the publishers any discrepancies or inaccuracies noticed. If errors in this work are found after publication, errata will be posted at www.thieme.com on the product description page.

Some of the product names, patents, and registered designs referred to in this book are in fact registered trademarks or proprietary names even though specific reference to this fact is not always made in the text. Therefore, the appearance of a name without designation as proprietary is not to be construed as a representation by the publisher that it is in the public domain.

This book, including all parts thereof, is legally protected by copyright. Any use, exploitation, or commercialization outside the narrow limits set by copyright legislation without the publisher's consent is illegal and liable to prosecution. This applies in particular to photostat reproduction, copying, mimeographing or duplication of any kind, translating, preparation of microfilms, and electronic data processing and storage.

I dedicate this book to my mentors, students, and patients, from whom I continue to learn how to be a better surgeon. Most importantly I dedicate this book to my wife whose love and support form the foundation upon which all my accomplishments rest.

– *BSB*

Dedicated to my mentors with much gratitude: Edward Jaeger, Neil Miller, John Woog, Arthur Grove, Katrinka Heher, and Michael Migliori.

– *SKF*

I dedicate this book to my dear friend, mentor and confidante, Dr Evan Richard Soicher, Ophthalmologist, taken from us in the prime of his life and at the peak of his career. His inspiration and persistent support for me to undertake this project was the driving force behind its publication. He will never be forgotten.

– *RS*

Contents

	Menu of Accompanying Videos	ix
	Foreword	xi
	Preface	xiii
	Contributors	xv
1	Anatomy of the Orbit and Paranasal Sinuses	1
	<i>George A. Scangas, Benjamin S. Bleier, and Lora R. Dagi-Glass</i>	
2	Anatomy, Physiology, and Treatment of the Tearing Adult	10
	<i>Natalie Wolkow and Michael K. Yoon</i>	
3	Radiologic Assessment of the Orbit and Lacrimal System	19
	<i>Katherine L. Reinshagen and Hugh Curtin</i>	
4	Evaluation and Management of Congenital Lacrimal Obstruction	32
	<i>Jonathan C. P. Roos and Suzanne K. Freitag</i>	
5	Evaluation and Management of Acquired Lacrimal Obstruction	39
	<i>Catherine Banks, Raymond Sacks, and Geoffrey Wilcsek</i>	
6	Pathogenesis of Thyroid Eye Disease	49
	<i>Catherine J. Choi and Nahyoung Grace Lee</i>	
7	Indications and Techniques for Orbital Decompression	54
	<i>Benjamin S. Bleier and Suzanne K. Freitag</i>	
8	Complications of Orbital Decompression and Management	60
	<i>Jordan T. Glicksman, James N. Palmer, and Nithin D. Adappa</i>	
9	Strabismus and Eyelid Surgery in Thyroid Eye Disease	65
	<i>Bo Young Chun, Suzanne K. Freitag, and Dean M. Cestari</i>	
10	Orbital Trauma Management, Reconstruction, and External Approaches to the Orbit	74
