The content, statements, views, and opinions herein are the sole expression of the respective authors and not that of Jones & Bartlett Learning, LLC. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise does not constitute or imply its endorsement or recommendation by Jones & Bartlett Learning, LLC and such reference shall not be used for advertising or product endorsement purposes. All trademarks displayed are the trademarks of the parties noted herein. *Essentials of Medical Genetics for Nursing and Health Professionals: An Interprofessional Approach* is an independent publication and has not been authorized, sponsored, or otherwise approved by the owners of the trademarks or service marks referenced in this product.

There may be images in this book that feature models; these models do not necessarily endorse, represent, or participate in the activities represented in the images. Any screenshots in this product are for educational and instructive purposes only. Any individuals and scenarios featured in the case studies throughout this product may be real or fictitious, but are used for instructional purposes only.

The authors, editor, and publisher have made every effort to provide accurate information. However, they are not responsible for errors, omissions, or for any outcomes related to the use of the contents of this book and take no responsibility for the use of the products and procedures described. Treatments and side effects described in this book may not be applicable to all people; likewise, some people may require a dose or experience a side effect that is not described herein. Drugs and medical devices are discussed that may have limited availability controlled by the Food and Drug Administration (FDA) for use only in a research study or clinical trial. Research, clinical practice, and government regulations often change the accepted standard in this field. When consideration is being given to use of any drug in the clinical setting, the health care provider or reader is responsible for determining FDA status of the drug, reading the package insert, and reviewing prescribing information for the most up-to-date recommendations on dose, precautions, and contraindications, and determining the appropriate usage for the product. This is especially important in the case of drugs that are new or seldom used.

DEDICATION

The profound privilege of being a healthcare provider revolves around our dedication to improving the human condition through our service to others. With the exception of our own families, we find our greatest joy in serving patients and their families as well as in mentoring and teaching students in our charge. This text is for the students, teachers, patients, colleagues, and families who seek to know more and serve better. May your knowledge and skills always be tempered by compassion, integrity, and humility—these virtues are essential to the character of a true Servant.

SPECIAL ACKNOWLEDGMENTS

Most often in one's career, it is the person's family who make the greatest sacrifices. Families are unseen contributors in even our smallest accomplishments. This is certainly the case of those persons engaged in clinical practice, research, and academia, as working during many weekends, holidays, and evenings is required of us. Thank you all for your love, encouragement, and prayers and for making that sacrifice.

It is also important to note the collaborative efforts of numerous disciplines that culminated in a truly interprofessional approach to this curriculum. This is a reflection of how we work in everyday practice to achieve the best outcomes for our patients.

CONTENTS

Preface xix
Contributors xxiii
Reviewers xxv

CHAPTER 1 **Introduction 3**
Basic Genetics 3
Mutation 6
Nondisjunction Syndromes 9
Genes in Individuals 13
Inheritance Patterns 13
Human Genome Project 21
Chapter Summary 22
Chapter Review Questions 22
Bibliography 22

CHAPTER 2	Diagnostic Techniques in Medical Genetics	25
	Family History	25
	Pedigree Analysis	25
	Cytogenetic Studies	29
	Fluorescence in Situ Hybridization	31
	DNA Analysis	33
	Biochemical Analysis	34
	Ethical Issues with Genetic Testing	35
	Chapter Summary	35
	Chapter Review Questions	36
	Bibliography	36
CHAPTER 3	Prenatal Genetics	39
	Overview	39
	Prenatal Screening	40
	Prenatal Diagnostic Testing	44
	What Can Be Done with the Sample?	46
	Known Mutation Analysis	47
	Carrier Screening	48
	In-Vitro Fertilization with Preimplantation Genetic Diagnosis and Preimplantation Genetic Screening	50
	Family History	50
	Chapter Summary	51
	Chapter Review Questions	51
	Bibliography	52

CHAPTER 4	Development and Teratogenesis	55
	Embryonic Development	55
	Implantation	56
	Congenital Abnormalities	58
	Thalidomide	60
	TORCH Complex	63
	Fetal Alcohol Syndrome	64
	Tobacco	65
	Cocaine	65
	Vitamin A	66
	Diethylstilbestrol	66
	Chapter Summary	67
	Chapter Review Questions	68
	Bibliography	68
CHAPTER 5	Genetic Counseling	71
	Definition and History of Genetic Counseling	71
	Essentials of Genetic Counseling	72
	Impact of Advances in Genetics/Genomics on Genetic Counseling	76
	Genetic Counseling Practice Areas	79
	Referral and Access to Genetic Counselors	81
	Conclusion	82
	Genetic Counseling Resources	83
	Chapter Summary	83
	Chapter Review Questions	84
	Bibliography	84
	facebook.com/LinguaLIB	
	vk.com/lingualib	

CHAPTER 6	Neurodegenerative Diseases	87
	Alzheimer's Disease	87
	Huntington's Disease	89
	Chapter Summary	92
	Chapter Review Questions	92
	Bibliography	93
CHAPTER 7	Hereditary Breast and Ovarian Cancer Syndrome	95
	Breast Cancer Genes	96
	Founder Effect	98
	Penetrance	99
	Other Syndromes Associated with Breast and Ovarian Cancer	99
	Management Options	100
	Chapter Summary	104
	Chapter Review Questions	105
	Bibliography	105
CHAPTER 8	Colorectal Cancer	109
	Familial Colorectal Cancer	111
	Hereditary Colorectal Cancer	111
	Familial Adenomatous Polyposis	111
	Hereditary Nonpolyposis Colorectal Cancer	113
	Chapter Summary	116
	Chapter Review Questions	116
	Bibliography	116

CHAPTER 9	Chronic Myelogenous Leukemia	119
	Major Phenotypic Features	120
	Genetics of Chronic Myelogenous Leukemia	121
	Phases of Chronic Myelogenous Leukemia	122
	Treatment	122
	Prognosis	124
	Chapter Summary	125
	Chapter Review Questions	125
	Bibliography	125
CHAPTER 10	Hemophilia	129
	Genetics of Hemophilia	129
	Diagnosis	131
	Genetic Testing and Counseling	132
	Management and Treatment	133
	Blood Product Transfusions	135
	Associated Syndromes	135
	Chapter Summary	136
	Chapter Review Questions	137
	Bibliography	137
CHAPTER 11	Sickle Cell Disease	139
	Epidemiology	141
	Phenotypic Features	141
	Clinical Diagnosis and Testing	143
	Other Sickle Cell Disorders	143
	Management and Treatment	144
	facebook.com/LinguaLIB	
	vk.com/lingualib	

Genetic Counseling	145
Chapter Summary	146
Chapter Review Questions	146
Bibliography	147

CHAPTER 12 Hemochromatosis 149

Phenotypic Features	149
Genetics of HFE-Associated Hemochromatosis	151
Diagnosis	151
Genetic Testing and Counseling	153
Management and Treatment	153
Associated Syndromes	154
Chapter Summary	155
Chapter Review Questions	155
Bibliography	156

CHAPTER 13 Cystic Fibrosis 159

Phenotypic Features	159
Genetics	161
Diagnosis	163
Genetic Testing and Counseling	164
Management, Treatment, and Surveillance	164
Associated Syndromes	165
Chapter Summary	166
Chapter Review Questions	166
Bibliography	166

CHAPTER 14	Osteogenesis Imperfecta	169
	Diagnosis	171
	Genetic Testing and Counseling	172
	Management and Treatment	174
	Chapter Summary	174
	Chapter Review Questions	174
	Bibliography	175
CHAPTER 15	Muscular Dystrophies	177
	Overview	177
	Diagnosis	180
	Genetic Testing and Counseling	183
	Associated Syndromes	184
	Management and Treatment	184
	Prognosis	186
	Chapter Summary	186
	Chapter Review Questions	186
	Bibliography	187
CHAPTER 16	Familial Thoracic Aortic Aneurysms and Dissections	189
	Diagnosis	190
	Genetic Testing and Counseling	193
	Management and Treatment	195
	Associated Syndromes	196
	Chapter Summary	196
	Chapter Review Questions	196
	Bibliography	197

CHAPTER 17	Familial Hypercholesterolemia	199
	Genetics	199
	Environmental Risk Factors	200
	Physical Examination Findings	200
	Related Disorders	201
	Environmental and Other Factors	202
	Testing	202
	Management and Surveillance	207
	Chapter Summary	209
	Chapter Review Questions	210
	Bibliography	210
CHAPTER 18	Hereditary Cardiomyopathies	213
	Diagnosis	214
	Genetic Testing and Counseling	215
	Management and Treatment	219
	Associated Syndromes	220
	Chapter Summary	221
	Chapter Review Questions	221
	Bibliography	222
CHAPTER 19	Marfan Syndrome	225
	Phenotypic Features	225
	Genetics of Marfan Syndrome	226
	Diagnosis	227
	Genetic Testing and Counseling	228
	Management and Treatment	229
