

The background of the cover features a microscopic view of various viruses. There are several large, spherical, pinkish-purple viruses with prominent surface spikes, resembling coronaviruses. Interspersed among them are smaller, blue, spherical viruses with shorter, more uniform spikes. The overall aesthetic is scientific and clinical, with a dark background that makes the colorful virus particles stand out.

**Part I Understanding, Controlling, and Preventing  
Infectious Diseases**

**A Epidemiology and Control of Infectious Diseases**

---

1 Principles of Epidemiology and Public Health

Descriptive Epidemiology

Analytic Epidemiology

Vaccine Efficacy Studies

Disease Control and Public Health Policy

Evaluating the Medical Literature

Acknowledgments

References

## 2 Pediatric Healthcare Epidemiology

Risk Factors for Healthcare-Associated Infections in Children

Transmission

Pathogens

Prevention Programs

References

## 3 Infections Associated With Group Childcare

Childcare Settings

Epidemiology and Etiology of Infections

Vaccine-Preventable Diseases

Infections Associated With Animals

Infectious Diseases in Adults

Economic Impact of Group Childcare Illness

Prevention

References

## 4 Infectious Diseases in Refugee and Internationally Adopted Children

Guidelines for Evaluation

Preventive Measures

References

## **B Prevention of Infectious Diseases**

### 5 Passive Immunization

Immune Globulin (Human)

Specific Immune Globulins for Intramuscular Administration

Immune Globulin Intravenous (Human)

Specific Immune Globulins for Intravenous Administration

Monoclonal Antibodies

Immunoglobulin Products Prepared From Animal Plasma

Adverse Reactions to Immune Globulins Prepared From Human Plasma

Product Shortages

The Future

References

### 6 Active Immunization

Immunization and Vaccines: Overview

Vaccine Development, Licensure, and Approval

Principles of Immunization Programs

Routine Childhood and Adolescent Vaccines

Selected Other Vaccines That Can Be Used in Children and Adolescents

Sources of Information on Vaccines

References

## 7 Antimicrobial Chemoprophylaxis

General Principles

Chemoprophylaxis in Healthy Children

Chemoprophylaxis for Surgical Procedures and Trauma

Chemoprophylaxis in Special Situations and in Children With Conditions Predisposing to Infection

References

## 8 Protection of Travelers

Preparation for Travel

Malaria

Travelers' Diarrhea

Emerging Infectious Diseases

Immunocompromised Travelers

Return From Travel

References

# **C Host Defenses Against Infectious Diseases**

---

## 9 Immunologic Development and Susceptibility to Infection

Innate Immune Response

Adaptive Immune Response

Interrelationships and the Future

References

## 10 Fever and the Inflammatory Response

Fever

Inflammatory Response

References

# **Part II Clinical Syndromes and Cardinal Features of Infectious Diseases: Approach to Diagnosis and Initial Management**

## **A Septicemia, Toxin, and Inflammation-Mediated Syndromes**

---

### 11 The Systemic Inflammatory Response Syndrome (SIRS), Sepsis, and Septic Shock

Specific Distinguishing Characteristics  
Diagnosis and Empiric Therapy  
References

### 14 Fever Without Localizing Signs

Etiologic Agents  
Epidemiology  
Laboratory Findings and Diagnosis  
Management  
References

### 15 Prolonged, Recurrent, and Periodic Fever Syndromes

Fever of Unknown Origin

Prolonged Insignificant Fever, Prolonged Illness With Resolved Fever,  
and Fatigue of Deconditioning

Recurrent Fever and Periodic Fever Syndromes

References

## 16 Lymphatic System and Generalized Lymphadenopathy

Anatomy and Function of Lymphoid Tissue

Developmental Changes

Characteristics of Lymphadenopathy

Pathogenesis of Lymphadenopathy and Lymphadenitis

Histopathology of Lymphadenitis

Lymphocutaneous and Oculoglandular Syndrome

Infectious Causes of Generalized Lymphadenopathy

Other Causes of Generalized Lymphadenopathy

References

## 17 Cervical Lymphadenitis and Neck Infections

Epidemiology

Lymphatic Flow and Fascial Spaces of the Head and Neck

Oculoglandular Syndrome of Parinaud

Infectious Causes of Lymphadenitis

Noninfectious Causes of Lymphadenopathy

Neck Masses Not Involving Lymph Nodes

Diagnostic Approach to Cervical Lymphadenopathy

Management

Complications

Acknowledgment

## **E Cardiac and Vascular Infections**

---

### 37 Endocarditis and Other Intravascular Infections

Infective Endocarditis  
Other Endocarditis-Like Intravascular Infections  
References

### 38 Myocarditis

Etiology  
Epidemiology  
Pathophysiology  
Clinical Manifestations  
Differential Diagnosis  
Laboratory Findings and Diagnosis  
Management  
Complications  
Prevention  
References

## 39 Pericarditis

Etiology

Epidemiology

Pathogenesis

Clinical Manifestations

Differential Diagnosis

Laboratory Findings and Diagnosis

Management

Complications

Prognosis

References

## **F Central Nervous System Infections**

---

### 40 Acute Bacterial Meningitis Beyond the Neonatal Period

Etiologic Agents and Epidemiology

Pathophysiology

Clinical Presentation

Laboratory Findings and Diagnosis

Management

Meningitis Due to Unusual Organisms

Supportive Care

Adjunctive Therapy

Prognosis

Prevention

## References

### 41 Chronic Meningitis

Etiology and Epidemiology

Main Features of Agents Causing Chronic Meningitis

Evaluation

Empiric Therapy

References

### 42 Recurrent Meningitis

Etiologic Agents

Epidemiology

Pathogenesis

Clinical Manifestations

Diagnosis

Treatment

Prevention and Prophylaxis

References

### 43 Aseptic and Viral Meningitis

Etiologic Agents and Epidemiology

Pathogenesis and Pathology

Clinical Manifestations

Differential Diagnosis

Laboratory Findings and Diagnosis

Management and Empiric and Definitive Therapy

Complications, Prognosis, and Sequelae

Prevention

#### 45 Parainfectious and Postinfectious Neurologic Syndromes

Cranial Nerve Palsies

Cerebellitis

Acute Disseminated Encephalomyelitis

Transverse Myelitis

Acute Inflammatory Demyelinating Polyradiculoneuropathy (Guillain–Barré Syndrome)

Acute Flaccid Myelitis

References

## 46 Focal Suppurative Infections of the Nervous System

Etiology

Epidemiology

Pathogenesis

Clinical Manifestations

Differential Diagnosis

Laboratory Findings and Diagnosis

Management

Complications and Prognosis

References

## 47 Eosinophilic Meningitis

Infectious Causes

Diagnosis and Treatment

References

# **G Genitourinary Tract Infections**

---

## 48 Urinary Tract Infections, Renal Abscess, and Other Complex Renal Infections

Etiologic Agents

Epidemiology

Definitions

Pathogenesis

Risk Factors for Bacteruria and Renal Damage

Clinical Manifestations

Laboratory Findings

Management

Complications and Sequelae

Complex Urinary Tract Infections: Imaging Evaluation

Special Considerations

References

## 49 Sexually Transmitted Infection Syndromes

Genitourinary Syndromes

Pharyngeal Syndromes

Dermatologic Syndromes

References

## 50 Skin and Mucous Membrane Infections and Inguinal Lymphadenopathy

Inguinal Lymphadenopathy With Genital Ulcers

Inguinal Lymphadenopathy Without Genital Ulcers

Genital Dermatitis

References

## 51 Urethritis, Vulvovaginitis, and Cervicitis

Urethritis

Vulvovaginitis

Cervicitis

References

## 52 Pelvic Inflammatory Disease

Epidemiology

Etiologic Agents

Pathogenesis and Pathologic Findings

Diagnosis

Laboratory Findings and Diagnosis

Management

Complications and Sequelae

Prevention

## 53 Epididymitis, Orchitis, and Prostatitis

Epididymitis

Orchitis

Prostatitis

References

## 54 Infectious Diseases Associated With Child Abuse

Medical Evaluation

Infectious Agents

References

# **H Gastrointestinal Tract Infections and Intoxications**

---

## 55 Approach to the Diagnosis and Management of Gastrointestinal Tract Infections

Epidemiology

Pathogenesis

Clinical Manifestations

Considerations of The Host and Exposures

Diagnosis

Treatment

Prevention

Acknowledgments

References

## 56 Viral Gastroenteritis

Etiologic Agents

Epidemiology

Pathogenesis

Clinical Manifestations

Diagnosis

Treatment

Prevention

References

## 57 Inflammatory Enteritis

Classification

Principal Etiologic Agents

Epidemiology

Pathogenesis

Diagnostic Evaluation

Inflammatory Enteritis in the Immunocompromised Host

Management

References

## 58 Necrotizing Enterocolitis

Epidemiology

Pathologic Findings and Pathogenesis

Clinical Manifestations, Differential Diagnosis, and Clinical Approach

Management

Prognosis and Complications

Advances in Understanding of Pathophysiology

Prevention

Acknowledgment

References

## 59 Enteric Diseases Transmitted Through Food, Water, and Zoonotic Exposures

Epidemiology

Pathogenesis and Clinical Syndromes

Enteric Disease Surveillance and Outbreak Detection

Diagnosis

Management

Complications

Prevention

References
