Photocopying

Single photocopies of single chapters may be made for personal use as allowed by national copyright laws. Permission of the Publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Permissions may be sought directly from Elsevier's Rights Department in Oxford, UK: phone (+44) 1865 843830, fax (+44) 1865 853333, e-mail: permissions@elsevier.com. Requests may also be completed on-line via the Elsevier homepage (<http://www.elsevier.com/locate/permissions>).

In the USA, users may clear permissions and make payments through the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA; phone: (+1) (978) 7508400, fax: (+1) (978) 7504744, and in the UK through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 0LP, UK; phone: (+44) 20 7631 5555; fax: (+44) 20 7631 5500. Other countries may have a local reprographic rights agency for payments.

Derivative Works

Tables of contents may be reproduced for internal circulation, but permission of the Publisher is required for external resale or distribution of such material. Permission of the Publisher is required for all other derivative works, including compilations and translations.

Electronic Storage or Usage

Permission of the Publisher is required to store or use electronically any material contained in this work, including any chapter or part of a chapter.

Except as outlined above, no part of this work may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the Publisher.

Address permissions requests to: Elsevier's Rights Department, at the fax and e-mail addresses noted above.

Notice

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made.

CONTENTS

PREFACE xv
CONTRIBUTORS xvii

I. Overview: Handbook of Pharmaceutical Analysis by HPLC

SATINDER AHUJA

I. Introduction	1
II. Key Concepts in HPLC	3
III. HPLC Instrumentation in Pharmaceutical Analysis	3
IV. HPLC Columns in Pharmaceutical Analysis	4
V. Sample Preparation	4
VI. Method Development	5
VII. Method Validation	5
VIII. Ion Chromatography	6
IX. How to be More Successful with HPLC Analysis	6
X. Regulatory Practices	7
XI. HPLC System Calibration	7
XII. System Validation	8
XIII. Assay and Stability Testing	9
XIV. Impurity Evaluations	9
XV. Dissolution Testing	10
XVI. Cleaning Validation	11
XVII. High-throughput Screening	11
XVIII. Chiral Separations	12
XIX. LC-MS	13
XX. LC-NMR	14
XXI. Chromatography Data Processing	16
XXII. New Developments in HPLC	16
References	16

2. **Key Concepts of HPLC in Pharmaceutical Analysis**

RAPHAEL M. ORNAF AND MICHAEL W. DONG

Abstract	20
I. Introduction	20
II. Fundamental Concepts	22
III. Mobile Phase Parameters	35
IV. Isocratic Vs. Gradient Analysis	39
V. Limit of Quantitation	43
VI. Glossary of HPLC Terms	43
VII. Summary and Conclusion	44
Acknowledgments	44
References	44

3. **HPLC Instrumentation in Pharmaceutical Analysis: Status, Advances, and Trends**

MICHAEL W. DONG

Abstract	48
I. Introduction	48
II. HPLC Solvent Delivery Systems	50
III. Manual Injectors	58
IV. Autosamplers	59
V. Detectors	62
VI. UV/Vis Absorbance Detectors	62
VII. Photodiode Array (PDA) Detectors	65
VIII. Other Detectors	67
IX. Data Handling	69
X. Instrumental Bandwidth (IBW)	69
XI. Instrumentation Trends in Pharmaceutical Analysis	72
XII. Manufacturers	73
XIII. Summary and Conclusion	73
Acknowledgments	73
References	73

4. **HPLC Columns for Pharmaceutical Analysis**

UWE D. NEUE, BONNIE A. ALDEN, PAMELA C. IRANETA,
ALBERTO MÉNDEZ, ERIC S. GRUMBACH, KIMVAN TRAN, AND
DIANE M. DIEHL

Abstract	77
I. Introduction	78

II. Column Physics	78
III. Column Chemistry	97
IV. Summary	119
References	120

5. Sample Preparation for HPLC Analysis of Drug Products

CLARK K. CHOI AND MICHAEL W. DONG

Abstract	123
I. Introduction	124
II. Sample Preparation Overview	125
III. Primary SP Concerns for Types of Analysis	133
IV. Sample Preparation Trends in Pharmaceutical Analysis	134
V. Case Studies	135
VI. Summary and Conclusion	142
Acknowledgments	142
References	143

6. HPLC Method Development

HENRIK T. RASMUSSEN, WEIYONG LI, DIRK REDLICH,
AND M. ILIAS JJIMIDAR

Abstract	145
I. Introduction	146
II. Phase-Appropriate Method Development	147
III. Proactive Method Development	149
IV. Development, Validation, and Use of Early Phase Methods	159
V. Final Method Development and Validation	166
VI. Conclusions	187
Acknowledgments	188
References	188

7. Validation of HPLC Methods in Pharmaceutical Analysis

ASHLEY S. LISTER

Abstract	192
I. Introduction	192
II. Validation Requirements for Method Type	194
III. Procedures and Protocols	196

IV. Validation Parameters	197
V. Method Validation by Phase of Development	211
VI. Reference Standards	212
VII. Method Transfer	212
VIII. Documentation	213
IX. Method Revalidation	213
X. Method-Validation Software	215
XI. Summary	216
Acknowledgments	216
References	216

8. Ion Chromatography

CHRISTOPHER POHL

Abstract	219
I. Introduction	219
II. Ion Chromatography Instrumentation	220
III. Chromatographic Components	221
IV. Pharmaceutical Ion Chromatography Applications	248
V. Summary and Conclusions	253
Acknowledgments	253
References	253

9. How to Be More Successful with HPLC Analysis: Practical Aspects in HPLC Operation

MICHAEL W. DONG

Abstract	255
I. Introduction	256
II. Mobile Phase Preparation	256
III. HPLC Pump-operating Guides	259
IV. HPLC Column-operating Guides	259
V. Detector-operating Guides	260
VI. Autosampler-operating Guides	261
VII. Quantitation-operating Guides	262
VIII. System Shutdown-operating Guides	263
IX. Summary of HPLC Operation	263
X. Keys for Success in HPLC	263
XI. Enhancing HPLC Precision	265
XII. Conclusion and Summary	269
Acknowledgments	270
References	270

10. Regulatory Considerations in HPLC Analysis

CHRISTINE F. RICHARDSON AND FRITZ ERNI

- Abstract 273
- I. Introduction 273
- II. Chromatography—Some Generalities 274
- III. Validation of Chromatographic Methods 276
- IV. Impurities 286
- V. Overview of Available Guidance Documents 290
- VI. Conclusions 290
- VII. Summary 290

11. HPLC System Calibration for GMP Compliance

MICHAEL W. DONG

- Abstract 291
- I. Introduction 291
- II. Overall Calibration Strategies 292
- III. Calibration Procedure: A Case Study 293
- IV. Overall Procedures and Documentation 299
- V. Summary and Conclusion 300
- Acknowledgments 301
- References 301

12. System Validation: Pre-Installation, IQ, OQ, and PQ

WILHAD M. REUTER

- Abstract 303
- I. Introduction: What is Validation, and Why Validate? 304
- II. Timeline and Definitions 304
- III. Pre-Installation 305
- IV. Upon Installation 309
- V. Post-Installation 323
- VI. Summary 332
- Acknowledgments 333
- References 333

13. Assay and Stability Testing

ANISSA W. WONG AND ARUNA DATLA

- Abstract 335
- I. Introduction 336

- II. Stability Program in Pharmaceutical Development 338
- III. Stability Testing by HPLC 346
- IV. Summary and Conclusion 357
 - Acknowledgments 357
 - References 358

14. Impurity Evaluations

TODD CECIL AND ERIC SHEININ

- Abstract 359
- I. Introduction 359
- II. Drug Substance Evaluation 363
- III. Impurities in Dosage Forms 375
- IV. Summary and Conclusion 377
 - Disclaimer 377
 - References 377

15. HPLC in Dissolution Testing

QINGXI WANG AND VIVIAN GRAY

- Abstract 379
- I. Introduction 380
- II. Utility of HPLC Analysis in Dissolution Testing 383
- III. Considerations of HPLC Methods in Dissolution Testing 385
- IV. HPLC in Automated and Robot-Assisted Dissolution Testing 390
- V. Requirements of HPLC Methods for Dissolution Testing During Drug Development Process 396
- VI. Conclusion 398
 - Acknowledgments 399
 - References 399

16. Cleaning Validation using HPLC for Analysis

ANDREW PLASZ

- Abstract 401
- I. Introduction 401
- II. Role of the Analyst 402
- III. Linearity, Detection and Quantitation 403
- IV. Validation of Rinse and Swabbing Procedures 404
- V. Recovery Studies off Surfaces 407
- VI. Verification of the Cleaning Procedure 410
- VII. Verifying the Removal of Cleaning Agents 410
- VIII. Conclusion 411

Acknowledgments 412

References 412

17. LC/MS Application in High-Throughput ADME Screen

RON KONG

Abstract 413

I. Introduction 414

II. Measurement of Physicochemical Properties 415

III. Cytochrome P450 Inhibition Assay 424

IV. Stability 427

V. Metabolite Profiling 430

VI. Quantitative Bioanalysis 432

VII. Summary and Conclusion 438

Acknowledgments 439

References 439

18. Chiral Separations

Y. VANDER HEYDEN, D. MANGELINGS, N. MATTHIJS, AND
C. PERRIN

Abstract 447

I. Introduction 448

II. Separation of Enantiomers of Pharmaceutical Interest Using LC
and CE 453

III. Separation of Enantiomers by Capillary Electrophoresis 457

IV. Separation of Enantiomers by Liquid Chromatography on Chiral
Stationary Phases 463

V. Practical Guidelines to Chiral HPLC Separations of
Pharmaceuticals 483

VI. Conclusion 488

References 489

19. Applications of LC/MS in Pharmaceutical Analysis

LEON Z. ZHOU

Abstract 500

I. Introduction 500

II. LC/MS Interfaces 503

III. Mass Analyzers 514

- IV. Practical Considerations in Selection of LC/MS Parameters 518
- V. Peak Tracking Between LC/UV and LC/MS Methods 526
- VI. Development of Generic LC/MS Method and LC/MS Database 528
- VII. MS-Assisted HPLC Method Development and Validation 535
- VIII. Impurity Profiling for Drug Substances and Pharmaceutical Products 541
- IX. Supporting Marketed Drug Products 553
- X. Conclusion 564
- Acknowledgments 565
- References 565

20. Application of LC-NMR in Pharmaceutical Analysis

MIENG-HUA WANN

- Abstract 569
- I. Introduction 570
- II. Instrumentation and Design 571
- III. Practical Applications 573
- IV. Related Hyphenated Techniques 576
- V. Conclusion 578
- References 578

21. Chromatography Data Systems (CDS) in the Pharmaceutical Laboratory: Its History, Advances, and Future Direction

ROBERT P. MAZZARESE

- Abstract 581
- I. Introduction 582
- II. A Historical Look at CDS Development 582
- III. Technological Advances 588
- IV. Specific Needs of the Pharmaceutical Industry 602
- V. Future Direction 608
- Acknowledgments 609
- References 609

22. New Developments in HPLC

SATINDER AHUJA AND DIANE M. DIEHL

- Abstract 611
- I. Introduction 611

II. Simplifying Sample Preparation	612
III. New Column Technologies	614
IV. Improvements in Detectors	615
V. Improvements in HPLC Throughput	616
VI. Summary	627
Acknowledgments	628
References	628
Index	631
